Jacek CUDNY

IN THE NET

„Everybody agrees that

sitting in the internet

is completely normal case

almost everywhere these days.

How it works? Is it hi-tech?"

- small fish thought - „I need to check!

By myself! Just me! Alone!"

Snap! The laptop was turned on.

„I will make a little trial.

For a moment. For a while.

That should be enough for me."

-little fish planned in the sea.

She was surfing on the net

for one and …. one hour yet.

And for sure, and no doubt,

time was running, running out.

She was surfing all the time.

„I will check everything fine.

- she thought – Now I will be fast.

One more hour. It's the last!"

And the fish did what she said -

she got back fast to the net.

She was surfing very busy,

until her family's visit.

Everybody made the wish:

„Happy birthday little fish!"

She said: „Hello everyone!

I don't have time for the fun!

We can't celebrate and met

because I am on the net!

I am busy. That is why

there will be no party. Bye!"

Little fish surfs on and on.

She starts early – before dawn! -

She surfs after nightfall yet!

She lives only in the net.

She has one – the major – rule:

Her family, friends from school,

and the others can't be met

because of the internet.

Should the fish be more and more

on the net just like before

or she should change her mindset

cause she … fell into the net?
