THE BEAST

This is curious and rare beast.

When it plans to feed and feast,

before the beast starts to dine,

it hunts standing - all the time.

And it doesn't run or leap

'cause it still stands. What a creep!

And another things! It has

no teeth to hunt or to fress!

And no venom's drop as well!

But this is crucial to tell

that this weird beast has a maw!!!

The maw is cruel as shark jaw !!!

When the victim of the beast

falls into the maw, there is

no help, no hope in this maw.

Any rescue! No! No! No!

What a beast has such great power?

The beast from a pot -the flower.

This is really nothing new,

because it is a ... sundew.
