

Jacek CUDNY

THE EAR

Buzzing fly is flying near
very peaceful and calm ear.
The ear's hearing: „Buzz! Buzz! Buzz!”
On and on. Two hundred plus!

The ear's saying: "Stomach. Hi!
I'm fed up with this fly!
I need your help! Please my dear!
Could this buzzing disappear?"

Helpful stomach, before long,
is conferring with the tongue,
that is catching the fly! Wow!
It is in the ... stomach now!!!

I would like to make it clear,
that the owner of this ear
isn't strange nor even odd.
This is usual, hungry toad.
